

Hidden Pictures 2010

My First Hidden Pictures - Find the Cupcake

This book is an introduction to hidden pictures for young children.

Hidden Pictures 2010

Each illustrated page presents a challenge to find various hidden objects.

Hidden Pictures

While searching for hidden objects in the full-color illustrations children improve eye-hand coordination, fine motor skills, and attention to detail.

Treasure Hunt for Girls

"Girls can develop counting and sorting skills as they search for the hundreds of hidden things in this engaging, bright and busy Treasure Hunt book."--Page 4 of cover

Ballroom Bonanza

Animals from alpacas to zebras gather in Blackpool for the annual dance competition, while the monkeys hide twenty-six musical instruments for which the reader is invited to search in the illustrations.

Hidden Pictures 2010 Vol 4

Each illustrated page presents a challenge to find various hidden objects.

The Amazing Harry Kellar

Presenting the amazing Harry Kellar: the first magician to receive international fame and the model for the Wizard of Oz! In this illustrated biography of the most well-known illusionist at the turn of the twentieth century, Author Gail Jarrow follows Kellar from a magician's assistant traveling and performing across the United States during the Civil War to an international superstar with a show of his own, entertaining emperors, kings, and presidents. Jarrow uses Kellar's own words and images—his amazing four-color promotional posters—to tell his riveting story in this first Kellar biography for young readers. And she reveals the science behind Kellar's illusions and explores nineteenth-century entertainment and transportation as well as the history of magic, spiritualism, and séances.

Hidden Pictures 2010 Vol 3

Each illustrated page presents a challenge to find various hidden objects.

Horse Indian Wolf

Hidden images are revealed in a collection of paintings by wildlife camouflage artist Judy Larson, along with stories providing clues to the images, as well as facts about the animals and Native American way of life.

Room

Kidnapped as a teenage girl, Ma has been locked inside a purpose built room in her captor's garden for seven years. Her five year old son, Jack, has no concept of the world outside and happily exists inside Room with the help of Ma's games and his vivid imagination where objects like Rug, Lamp and TV are his only friends. But for Ma the time has come to escape and face their biggest challenge to date: the world outside Room.

Private Pictures

Snapshots taken by American soldiers of Iraqi prisoners stripped naked, humiliated and tortured shocked the world in 2004 and more have followed from the conflict in Afghanistan, but whether the public have been horrified by the soldiers' conduct or the fact they have taken pictures has not been clear. In fact, as this remarkable book reveals and relates, soldiers have taken photographs of war and its atrocities for more than 100 years. But their pictures are private, intended mainly for the soldiers themselves, as mementoes or as attempts to make sense of the chaos, brutality and boredom of war. They can be gruesome or sociable, shocking or mundane and they are seldom regarded as serious contributions to a visual culture of war, which since 1939 has been dominated by professional war photography. But with the 21st-century shift to simple digital photography, transmission by the internet available to all, and a new 'citizen journalism', soldiers' pictures are acquiring a new resonance. \"Private Pictures\" traces this unacknowledged genre of photography from the origins of popular photography in the Boer War through to the present day; it discusses how the images have been used and it asks: what effect might the wider appreciation of soldiers' pictures have on the popular perception of war?

Ultimate Hidden Pictures Across America

These are truly the ultimate in hidden pictures. Jam-packed scenes on every page give hidden picture aficionados the ultimate challenge as they search for a checklist of items that are cleverly obscured within each spread. To add to the fun, each scene is also chock-full of visual jokes and humorous word balloons that will keep kids entertained for hours. Just in time for travel, Ultimate Hidden Pictures takes us on the ultimate road trip across America. From California beaches and Arizona canyons to North Carolina caverns and New England fishing towns, no corner of the United States is left unvisited! Whether diving for sunken treasure or swimming with the fish, this is the ultimate excursion under the water. There's more to watch for than just the whales, and there's more hidden beneath the waves than you've ever suspected!

The Hidden Alphabet

Two-time Caldecott Honoree Laura Vaccaro Seeger delivers another top quality lift-the-flap picture book, perfect for gifting! Look no farther for the perfect tactile alphabet book. See a word illustrated in bold, mesmerizing color and line; then, lift the flap to discover how the shape makes a part of the letter! Ideal for a baby shower or holiday gift, this sensory delight is an early reading lesson kids will want to get their hands on again and again. Laura Vaccaro Seeger, beloved creator of books like Red, Blue, Green, and the Dog and Bear Series, brings her entrancingly colorful style and inventive use of die cuts to an alphabet book a cut above the rest. Can't get enough of Laura Vaccaro Seeger's lift-the-flap books? Don't miss Animal Countdown, also available now!

Hide!!!

Children play a game of hide-and-seek. Illustrations contain hidden objects for which the reader may search.

The Moon Dragon (The Secrets of Droon #26)

A hidden door. A magical staircase. Discover the world of Droon! There's no place like home! Eric and his friends have finally restored the Rainbow Stairs, but that was the easy part. Now Gethwing is loose in the Upper World, and the Moon Dragon is causing big trouble. Eric, Julie, and Neal have to protect their town, but they're up against mysterious creatures, strangely-behaving parents, and powerful magic. Can the kids stop Gethwing before he destroys the Upper World -- for good?

Hidden Pictures 2000

Each illustrated page presents a challenge to find various hidden objects.

Fault Lines

From an economist who warned of the global financial crisis, a new warning about the continuing peril to the world economy Raghuram Rajan was one of the few economists who warned of the global financial crisis before it hit. Now, as the world struggles to recover, it's tempting to blame what happened on just a few greedy bankers who took irrational risks and left the rest of us to foot the bill. In *Fault Lines*, Rajan argues that serious flaws in the economy are also to blame, and warns that a potentially more devastating crisis awaits us if they aren't fixed. Rajan shows how the individual choices that collectively brought about the economic meltdown—made by bankers, government officials, and ordinary homeowners—were rational responses to a flawed global financial order in which the incentives to take on risk are incredibly out of step with the dangers those risks pose. He traces the deepening fault lines in a world overly dependent on the indebted American consumer to power global economic growth and stave off global downturns. He exposes a system where America's growing inequality and thin social safety net create tremendous political pressure to encourage easy credit and keep job creation robust, no matter what the consequences to the economy's long-term health; and where the U.S. financial sector, with its skewed incentives, is the critical but unstable link between an overstimulated America and an underconsuming world. In *Fault Lines*, Rajan demonstrates how unequal access to education and health care in the United States puts us all in deeper financial peril, even as the economic choices of countries like Germany, Japan, and China place an undue burden on America to get its policies right. He outlines the hard choices we need to make to ensure a more stable world economy and restore lasting prosperity.

The Hidden Force

In *The Hidden Force*, Dutch writer Louis Couperus presents a prescient critique of European colonialism that was decades ahead of its time. The novel follows Dutch expat Van Oudyk in his life in Java, as he comes to grips with the damage wrought by Western incursions into foreign cultures, not only on a grand scale, but also within his own family.

Made You Look

Introducing the most eye-catching compendium of picture puzzles the world has ever seen. *Made You Look* is packed with every variety of visual amusement you can think of: hidden pictures, matching games, needle-in-a-haystack searches, what's-wrong-with-these-pictures pages, super close-up mystery photos, visual puns and much more! *Made You Look* is one of those extraordinary books that get embraced by kids and parents alike, though for different reasons. Kids love the fascinating funny scenes, the intricate imaginative detail and the intriguing new challenges they encounter with every turn of the page.

I Who Have Never Known Men

A work of fantasy, *I Who Have Never Known Men* is the haunting and unforgettable account of a near future on a barren earth where women are kept in underground cages guarded by uniformed groups of men. It is

narrated by the youngest of the women, the only one with no memory of what the world was like before the cages, who must teach herself, without books or sexual contact, the essential human emotions of longing, loving, learning, companionship, and dying. Part thriller, part mystery, *I Who Have Never Known Men* shows us the power of one person without memories to reinvent herself piece by piece, emotion by emotion, in the process teaching us much about what it means to be human.

Where's Waldo? the Great Picture Hunt!

A new Waldo adventure book with hidden characters and objects, spot-the-difference spreads, silhouettes to match with originals, and plenty more.

Hidden Pictures Around the World

With better ways to get your photos online and new options for creating printed projects, iPhoto '11 makes it easier than ever to transfer photos from a digital camera, organize them, and publish, print, or share them in maps—but there's still no printed manual for the program. Fortunately, David Pogue and Lesa Snider team up in this witty, authoritative book that should have been in the box. Organize your collection. Discover all of the options for grouping your pictures—by events, in albums, or based on who's in the photo or where it was taken. Sharpen your editing skills. Learn how to use iPhoto's beefed-up editing options, including its Photoshop-like adjustments panel. Share images online. Get your photos to everyone on your list by publishing them to Flickr, Facebook, and MobileMe. Dive into creative projects. Have fun building slideshows (with music), gift books, calendars, and cards.

iPhoto '11: The Missing Manual

Alfred Hitchcock's 1951 thriller based on the novel of the same name by Patricia Highsmith (author of *The Talented Mr. Ripley*) is about two men who meet on a train: one is a man of high social standing who wishes to divorce his unfaithful wife; the other is an enigmatic bachelor with an overbearing father. Together they enter into a murder plot that binds them to one another, with fatal consequences. This *Queer Film Classic* delves into the homoerotic energy of the film, especially between the two male characters (played by Farley Granger and Robert Walker). It builds on the question of the sexuality the film puts on view, not to ask whether either character is gay so much as to explore the queer relations between sexuality and murder and the strong antisocial impulses those relations represent. The book also includes a look at the making of the film and the critical controversies over Hitchcock's representations of male homosexuality. *QUEER FILM CLASSICS* is a critically acclaimed film book series that launched in 2009. It features twenty-one of the most important and influential films about and/or by LGBTQ people, made in eight different countries between 1950 and 2005, and written by leading LGBTQ film scholars and critics. Jonathan Goldberg is a professor at Emory University, where he directs the Studies in Sexualities program. He is the author of many books and editor of Eve Kosofsky Sedgwick's posthumous 2012 book *The Weather in Proust*.

Strangers on a Train

Preschoolers will have hours of fun with this activity-packed book. There are puzzles to complete, pictures to color in, drawing activities, as well as over 200 stickers to place on the book pages. A great way for kids to learn while having fun.

Preschool Sticker Activity Book

The hidden histories and personal narratives of some of the most evocative objects in the V+A's collection are revealed, from the origins of the 'love poem' on the Chapman marriage coverlet to the sources of inspiration for the intricately pieced pictorial 'George III coverlet'.

Quilts 1700-2010

Extensive account of the cameo's production history and how audiences affirm their mastery of celebrity culture. *Stars and Silhouettes: The History of the Cameo Role in Hollywood* traces the history of the cameo as it emerged in twentieth-century cinema. Although the cameo has existed in film culture for over a century, Joceline Andersen explains that this role cannot be strictly defined because it exists as a constellation of interactions between duration and recognition, dependent on who is watching and when. Even audiences of the twenty-first century who are inundated by the lives of movie stars and habituated to images of their personal friends on screens continue to find cameos surprising and engaging. Cameos reveal the links between our obsession with celebrity and our desire to participate in the powerful cultural industries within contemporary society. Chapter 1 begins with the cameo's precedents in visual culture and the portrait in particular—from the Vitagraph executives in the 1910s to the emergence of actors as movie stars shortly after. Chapter 2 explores the fan-centric desire for behind-the-scenes visions of Hollywood that accounted for the success of cameo-laden, Hollywood-set films that autocratic studios used to make their glamorous line-up of stars as visible as possible. Chapter 3 traces the development of the cameo in comedy, where cameos began to show not only glimpses of celebrities at their best but also of celebrities at their worst. Chapter 4 examines how the television guest spot became an important way for stars and studios to market both their films and stars from other media in trades that reflected an increasingly integrated mediascape. In Chapter 5, Andersen examines auteur cameos and the cameo as a sign of authorship. Director cameos reaffirm the fan's interest in the film not just as a stage for actors but as a forum for the visibility of the director. Cameos create a participatory space for viewers, where recognizing those singled out among extras and small roles allows fans to demonstrate their knowledge. *Stars and Silhouettes* belongs on the shelf of every scholar, student, and reader interested in film history and star studies.

Stars and Silhouettes

What if it is simply unconscious biases — in the way of memory, emotion and attention — that produce most misunderstandings and conflicts between people, groups and even nations? How can you tell if it isn't just your brain running on 'auto-pilot' that makes your moral decisions for you, instead of the logical thinking you've nurtured and developed? Reminiscent of Malcolm Gladwell's *Blink*, *The Hidden Brain* takes a look at how we actually think both consciously and unconsciously. In *The Hidden Brain*: how our unconscious minds elect presidents, control markets, wage wars, and save our lives, author and science journalist Shankar Vedantam describes unique cases of everyday unconscious decision making while applying the latest scientific studies to each situation. The result is fascinating. *The Hidden Brain* explores numerous questions and doubts about the choices we make and updates us on the most recent scientific research on unconscious thinking. Shankar believes most everything we do boils down to the inner workings of our brains. Most human actions are based on unconscious biases, not conscious decisions. Looking into 'the hidden brain' is how he can best explain, scientifically, the many contradictory and illogical things people say and do, regardless of their ability to reason. Shankar's recent journalism enables the lay-person to understand what the scientific and human behaviorist communities are discovering. And his book delves into a wide variety of stories that intriguingly point toward the astounding notion that people are much more dependent on the unconscious than most of us would like to believe, by linking this research to real life situations. If it isn't the unconscious how else do you explain biases that prompt us to think that a black woman leaning over a hospital bed is a nurse, rather than a surgeon? How do you explain why well-meaning managers choose some candidates for job interviews while eliminating others who are equally qualified? Can you explain why people don't always run out of a burning building?

The Hidden Brain

The computer recognition systems are nowadays one of the most promising directions in artificial intelligence. This book is the most comprehensive study of this field. It contains a collection of 86 carefully selected articles contributed by experts of pattern recognition. It reports on current research with respect to

both methodology and applications. In particular, it includes the following sections: Biometrics Data Stream Classification and Big Data Analytics Features, learning, and classifiers Image processing and computer vision Medical applications Miscellaneous applications Pattern recognition and image processing in robotics Speech and word recognition This book is a great reference tool for scientists who deal with the problems of designing computer pattern recognition systems. Its target readers can be the as well researchers as students of computer science, artificial intelligence or robotics.

Proceedings of the 8th International Conference on Computer Recognition Systems CORES 2013

Can poetry articulate something about love that philosophy cannot? The Form of Love argues that it can. In close readings of seven “metaphysical” poems, the book shows how poets of the early modern period and beyond use poetic form to turn philosophy to other ends, in order not to represent the truth about love but to create a virtual experience of love, in all its guises. The Form of Love shows how verse creates love that can’t exist without poetry’s specific affordances, and how poems can, in their impossibility, prompt love’s radical re-imagining. Like the philosophies on which they draw, metaphysical poems imagine love as an intense form of non-sovereignty, of giving up control. They even imagine love as a liberating bondage—to a friend, a beloved, a saint, a God, or a garden. Yet these poems create strange, striking versions of such love, made in, rather than through, the devices, structures, and forces where love appears. Tracing how poems think, Kuzner argues, requires an intimate form of reading: close—even too close—attention to and thinking with the text. Showing how poetry thinks of love otherwise than other fields, the book reveals how poetry and philosophy can nevertheless enter into a relation that is itself like love.

The Form of Love

It's the most engaging alphabet book ever! This I Spy classic is back and better than ever, with a fresh design and perfect for back-to-school season. I Spy A to Z features stunning collections of picture riddles with challenging fun for children in kindergarten to third grade -- but everyone in your family will enjoy unplugged time together! Search for objects hidden within themed photographs and try to solve the rhyming riddles. The vibrant pages of the I Spy series are an incredible way to get readers of all ages excited about animals, letters, numbers, and holidays. I Spy books teach kids how to observe their surroundings and look for patterns in the world around them, skills that will help them succeed in all subjects. The series is a perfect fit for the STEAM curriculum. The New York Times bestselling series by Jean Marzollo and photographer Walter Wick continues to amaze search-and-find fans. The captivating photographs paired with clever rhyming puzzles will mesmerize readers of all ages.

I Spy a to Z: a Book of Picture Riddles

-A fun, illustrated book for boys aged five and over-Each book features busy, colourful scenes packed with multiple images and objects to seek and find-Children will have hours of fun searching the pages, while developing key skills including sorting, counting and matching

Last Lecture

This book attempts to clarify the narrative conditions of humanism, asking how we can use stories to complicate our understanding of others, and questioning the ethics and efficacy of attempts to represent human social complexity in fiction. With case studies of films like Parenthood (1989), American Beauty (1999), Little Miss Sunshine (2006) and The Kids Are All Right (2010), this original study synthesises leading discourses on media and cognition, evolutionary anthropology, literature and film analysis into a new theory of the storytelling instinct.

Hidden Pictures

This new edition of *The Photographic Image in Digital Culture* explores the condition of photography after some 20 years of remediation and transformation by digital technology. Through ten especially commissioned essays, by some of the leading scholars in the field of contemporary photography studies, a range of key topics are discussed including: the meaning of software in the production of photograph; the nature of networked photographs; the screen as the site of photographic display; the simulation of photography in the videogame; photography, ubiquitous computing and technologies of ambient intelligence; developments in vernacular photography and social media; the photograph and the digital archive; the curation and exhibition of the networked photograph; the dominance of the image bank in commercial and advertising photography; the complexities of citizen photojournalism. A recurring theme addressed throughout is the nature of 'photography after photography' and the paradoxical nature of the medium in the 21st century; a time when the traditional technology of photography has become defunct while there is more 'photography' than ever. This is an ideal book for students studying photography and digital media.

Treasure Hunt for Boys

This landmark text integrates diverse perspectives on how humans understand others' minds (or 'theory of mind') beyond early childhood into middle childhood and adolescence. It explores how the neural, cognitive, and social changes of middle childhood and adolescence shape the ongoing development of theory of mind, and how theory of mind helps children navigate their lives. Drawing on cutting-edge research from leading international experts, this book provides a survey and analysis of the current state and future direction of the field. It is organized around three themes relating to the key issues in contemporary research. The first part focuses on the biological and cognitive bases of theory of mind in middle childhood and adolescence. The second part goes on to explore the social predictors and consequences, considering how theory of mind is shaped by social experiences and, in turn, impacts children's social lives in middle childhood and adolescence. Finally, the third part focuses on theory of mind in the context of neurodiversity, disability, and youth mental health in middle childhood and adolescence. Offering in-depth understanding for all students and scholars of developmental and cognitive psychology, neuroscience, clinical psychology and psychiatry, and education, this valuable text also identifies an agenda for future scholarship on this exciting topic.

Narrative Humanism

Honorable Mention, 2018 MLA Prize for a First Book Against the defensive backdrop of countless apologetic justifications for the value of literature and the humanities, *Futile Pleasures* reframes the current conversation by returning to the literary culture of early modern England, a culture whose defensive posture toward literature rivals and shapes our own. During the Renaissance, poets justified the value of their work on the basis of the notion that the purpose of poetry is to please and instruct, that it must be both delightful and useful. At the same time, many of these writers faced the possibility that the pleasures of literature may be in conflict with the demand to be useful and valuable. Analyzing the rhetoric of pleasure and the pleasure of rhetoric in texts by William Shakespeare, Roger Ascham, Thomas Nashe, Edmund Spenser, and John Milton, McEleney explores the ambivalence these writers display toward literature's potential for useless, frivolous vanity. Tracing that ambivalence forward to the modern era, this book also shows how contemporary critics have recapitulated Renaissance humanist ideals about aesthetic value. Against a longstanding tradition that defensively advocates for the redemptive utility of literature, *Futile Pleasures* both theorizes and performs the queer pleasures of futility. Without ever losing sight of the costs of those pleasures, McEleney argues that playing with futility may be one way of moving beyond the impasses that modern humanists, like their early modern counterparts, have always faced.

The Photographic Image in Digital Culture

In 1957, a decade before Roland Barthes announced the death of the author, François Truffaut called for a

new era in which films would “resemble the person who made” them and be “even more personal” than an autobiographical novel. More than five decades on, it seems that Barthes has won the argument when it comes to most film critics. The cinematic author, we are told, has been dead for a long time. Yet Linda Haverty Rugg contends not only that the art cinema auteur never died, but that the films of some of the most important auteurs are intensely, if complexly, related to the lives and self-images of their directors. *Self-Projection* explores how nondocumentary narrative art films create alternative forms of collaborative self-representation and selfhood. The book examines the work of celebrated directors who plant autobiographical traces in their films, including Truffaut, Bergman, Fellini, Tarkovsky, Herzog, Allen, Almodóvar, and von Trier. It is not simply that these directors, and many others like them, make autobiographical references or occasionally appear in their films, but that they tie their films to their life stories and communicate that link to their audiences. Projecting a new kind of selfhood, these directors encourage identifications between themselves and their work even as they disavow such connections. And because of the collaborative and technological nature of filmmaking, the director’s self-projection involves actors, audience, and the machines and institution of the cinema as well. Lively and accessible, *Self-Projection* sheds new light on the films of these iconic directors and on art cinema in general, ultimately showing how film can transform not only the autobiographical act but what it means to have a self.

Theory of Mind in Middle Childhood and Adolescence

The only book to cover the evolution of one of the most important areas of philosophy The birth of the Enlightenment heralded a new reverence for the power of reason. But as science flourished in Europe, violence and brutality did not abate. In the French Revolution, thousands were guillotined and the death toll was vast. Philosophers asked whether we had become dehumanised by rationality and abstract political theory. Did art and literature provide a way to rediscover our soul and our compassion? Or could art be corrupted just as easily, used as propaganda to justify abhorrent acts? In this masterful survey of European aesthetics over the last two hundred years, philosopher Robert L. Wicks argues that it is this tension between creativity and rationality that has characterised debate in the subject. Presenting the theories of sixteen seminal thinkers, including Kant, Nietzsche, Freud, and Derrida, *European Aesthetics* shows how each philosopher’s theory of art was motivated by broader topics in their thought, concerning who we are and what a good society should resemble. With colour photographs and written in a lively but objective tone, Wicks analyses important pieces of art, makes critical comparisons between thinkers, and offers a bold conclusion on our contemporary aesthetic situation. In an internet age, where we are presented with endless opportunity, but also startling existential questions, this is the definitive account of the evolution of continental thought in this hugely relevant and exciting area of philosophy.
