This machine clears weeds from water

It is like an underwater lawnmower

It's called an Aquatic Weed Harvester

It can clear all types of vegetation

It can clear tonnes of waste each day

How does it work?

A conveyor belt is at the front of the machine

This is lowered under the water

The harvester then cuts the vegetation in the water

It collects and stores the weeds on board the boat

Once full, the harvester returns to shore to unload

It can clean up various types of waterways

They also have a beach and sand cleaner

This rakes rubbish out of the sand of beaches

Taking the waste through its conveyor belt to be stored

It works very similarly to the sea harvester

Amazing
