LG Portable AC - Power Issues - LG Portable AC - Power Issues 1 minute, 44 seconds - Check the following to ensure that your unit is working properly if you are experiencing power issues. Models: LP1419IVSM ...

Your LG portable air conditioner will cycle on and off when it reaches your desired set temperature.

If the unit powers off unexpectedly...

Make sure your unit is connected to a properly rated, protected, and grounded wall outlet.

If your wall outlet has a ground fault circuit interrupter or residual current device, make sure it has not been tripped.

If it has, push the test and reset button.

Be sure to check the circuit breaker to see if the circuit dedicated to the portable air conditioner has been tripped.

Reset this if necessary.

For additional safety, the portable air conditioner's power cord features an integrated circuit breaker.

While the unit is off, test the circuit breaker by pressing the "TEST" button then the "RESET" button.

If the "TEST" button does not cause the circuit breaker to trip, or if the "RESET" button will not stay engaged...

unplug the air conditioner immediately and contact an LG Customer Information Center for service.

Replace the batteries in the remote if necessary.

If using the LG SmartThinQ® app, make sure your smartphone has adequate signal...
