Dreams of Home

It's 1916, and war is raging on France's Western Front. Bill Parker and Jack Reynolds, best mates and Aussie larrikins, as well as veterans and heroes of Gallipoli and the Western Front, are chosen by the British Intelligence to carry out a secret mission behind German lines. A rogue German scientist has developed a deadly gas that can kill almost instantaneously. Together with a homicidal American mercenary, they have forced captured Allied POWs to construct a POW camp with a built-in battlefield, trenches and all, in the Bulgarian hinterland. Their plan is to test the effects of the gas on the live Allied prisoners for the German general staff. If successful, the gas will be mass produced and deployed on the Front, resulting in certain victory for Germany and hundreds of thousands of Allied lives lost. Parker and Reynolds track them across Europe and Africa on a desperate race against time, fighting running battles with conventional German forces all the while, to a final confrontation in deepest Africa. Bill Parkers dreams of his life and his love back home in Australia play an integral part in his survival and the outcome of his mission.

Deep Learning in Medical Image Analysis and Multimodal Learning for Clinical Decision Support

This book constitutes the refereed joint proceedings of the 4th International Workshop on Deep Learning in Medical Image Analysis, DLMIA 2018, and the 8th International Workshop on Multimodal Learning for Clinical Decision Support, ML-CDS 2018, held in conjunction with the 21st International Conference on Medical Imaging and Computer-Assisted Intervention, MICCAI 2018, in Granada, Spain, in September 2018. The 39 full papers presented at DLMIA 2018 and the 4 full papers presented at ML-CDS 2018 were carefully reviewed and selected from 85 submissions to DLMIA and 6 submissions to ML-CDS. The DLMIA papers focus on the design and use of deep learning methods in medical imaging. The ML-CDS papers discuss new techniques of multimodal mining/retrieval and their use in clinical decision support.

Tempo

A study of the Speziale al Giglio apothecary shop in fifteenth-century Florence, Italy.

Making and Marketing Medicine in Renaissance Florence

No legal system in the world has aroused as much public interest as Sharia. However, the discourse around Sharia law is largely focussed on its development and the theories, principles and rules that inform it. Less attention has been given to studying the consequences of its operation, particularly in the area of Islamic criminal law. Even fewer studies explore the actual practice of Islamic criminal law in contemporary societies. This book aims to fill these gaps in our understanding of Sharia law in practice. It deals specifically with the consequences of enforcing Islamic criminal law in Pakistan, providing an in-depth and critical analysis of the application of the Islamic law of Qisas and Diyat (retribution and blood money) in the Muslim world today. The empirical evidence adduced more broadly demonstrates the complications of applying traditional Sharia in a modern state.

Country Report

In Binge, Barrett Seaman reveals what every parent, student, and educator needs to know about the college experience. Seaman spent time with students at twelve highly regarded and diverse colleges and universities

across North America. During his two years of research, he immersed himself in the lives of the students, often living in their dorms, dining with them, speaking with them on their own terms, and listening to them express their thoughts and feelings. Portraying a campus culture in which today's best and brightest students grapple with far more than academic challenges, Binge conveys the unprecedented stresses on campus today. While sharing revealing interviews and the often dramatic stories, Seaman explores the complexities of romantic relationships and sexual relations, alcohol and drug use, anxiety and depression, class and racial boundaries, and more. Despite the disturbing trends, Seaman finds reasons for optimism and offers provocative and well-informed suggestions for improving the undergraduate experience. Sometimes alarming, always fascinating, and ultimately hopeful, Binge is an extraordinary investigative work that reveals the realities of higher education today.

The Application of Islamic Criminal Law in Pakistan

A fortnightly bulletin on financial and political trends.

The Journal of the Assembly During the ... Session of the Legislature of the State of California

The colloquium held at the Warburg Institute and the University of Warwick in May 1992 to mark the 500th anniversary of Lorenzo de' Medici's death included papers by historians of art and literature, drama and public spectacle, and politics and society. This volume examines Lorenzo's world.

Supreme Court Appellate Division

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

Movies Made for Television, 1964-2004: 1990-1999

Since 1969, Ethan Allen has been the subject of three biographical studies, all of which indulge in sustaining and revitalizing the image of Allen as a physically imposing Vermont yeoman, a defender of the rights of Americans, an eloquent military hero, and a master of many guises, from rough frontiersman to gentleman philosopher. Seeking the authentic Ethan Allen, the authors of this volume ask: How did that Ethan Allen secure his place in popular culture? As they observe, this spectacular persona leaves little room for a more accurate assessment of Allen as a self-interested land speculator, rebellious mob leader, inexperienced militia officer, and truth-challenged man who would steer Vermont into the British Empire. Drawing extensively from the correspondence in Ethan Allen and his Kin and a wide range of historical, political, and cultural sources, Duffy and Muller analyze the factors that led to Ethan Allen's two-hundred-year-old status as the most famous figure in Vermont's past. Placing facts against myths, the authors reveal how Allen acquired and retained his iconic image, how the much-repeated legends composed after his death coincide with his life, why recollections of him are synonymous with the story of Vermont, and why some Vermonters still assign to Allen their own cherished and idealized values.

Whether you've called London your home for decades or just arrived last night, there's information in the Not For Tourists Guide to London that you need to know. From intimate neighborhood details to how to score tickets to the big football match, this guide will help you master this amazing city like an expert. Packed with over 100 maps and thousands of restaurants, shops, theaters, and under-the-radar spots, you won't find a better guide to London. The book also features: - An invaluable street index - A foldout map of the London Underground and bus system - Profiles of over 100 neighborhoods - Listings for museums and

landmarks - A guide to the best shopping You don't need to be Sherlock Holmes to solve the mysteries of London: NFT has all the answers!

Africa Analysis

This volume is the result of lectures delivered at the second meeting on the subject of nonlinear partial differential equations, held at Tohoku University, 27-29 February 1984. The topics presented at the conference range over various fields of mathematical physics.

Lorenzo the Magnificent

This book seeks to re-appreciate the concept of customary international law as a form of spontaneous societal self-organisation, and to develop the methodological consequences that ensue from this conception for the practice of its application. In pursuing this aim, the author draws from three different strands of scholarship that have not yet been considered in connection with one another: First, general jurisprudential theories of customary law; second, theories of customary international law, especially as they relate to international relations scholarship; and third, methodological approaches to the interpretation of international law. This expansive, philosophical layout of the book enables the author to put the conceptual enigmas of customary international law into a broader perspective. Among the issues discussed in the book are the dichotomy of its traditional and modern forms and the respective benefits and disadvantages of inductive and deductive approaches to its ascertainment. In the course of this analysis, the author draws insights from Friedrich August Hayek's theory of law as a 'spontaneous order', an information-processing device which enables the participants of a legal system to make use of decentralised knowledge. The book argues that the major advantage of custom as a source of international law lies in the fact that it is the result of a gradual process of trial and error, rather than the product of deliberate planning. This makes it a particularly apposite source of law in a time of seismic shifts in the distribution of power within a vastly diverse community of States, when a new global order is expected to emerge, the contours of which are not yet clearly discernible. This book applies general concepts of legal philosophy to explain the continuing relevance of custom as a source of international law while at the same time inferring from this theoretical framework concrete practical and methodological consequences, the most important of which is the special role that purposive interpretation plays with respect to rules of international custom. Given this broad approach, the book will be of interest to several groups of potential readers including academics interested in the philosophy of customary law in general, academic international lawyers and legal practitioners, especially judges, scholars of international relations and all those interested in how the international community of States organises itself.

Interstate Certified Shellfish Shippers List

In World War I, 35 relatives of the Collins family aged between 18 and 57 volunteered for service - 15 came from the Collins side while 20 were from the Byrne side. Some never passed the enlistment process. Of those who served overseas, many were injured and a saddening percentage died. With interest in the war high due to its centenary, this book honours those who answered the call by detailing their service and lives using primary documents and the vast amount of resources available for researchers. It is hard to say whether these veterans cover the full range of Australia's involvement during the Great War, from being enlisted for a few weeks at the end of the war to dying, but there is no denying the 34 men and one woman whose lives are recorded here encompass a broad range of the Australian experience during the conflict.

Committee Serial No. 33. Considers minor military legislation on the acquisition and disposal of Fed govt property on military bases and posts and sale of the synthetic rubber producing plant at Institute, W. Va.

Climatological Data

The Afterlife of the Leiden Anatomical Collections starts where most stories end: after death. It tells the story of thousands of body parts kept in bottles and boxes in nineteenth-century Leiden – a story featuring a struggling medical student, more than one disappointed anatomist, a monstrous child, and a glorious past. Hieke Huistra blends historical analysis, morbid anecdotes, and humour to show how anatomical preparations moved into the hands of students and researchers, and out of the reach of lay audiences. In the process, she reveals what a centuries-old collection can teach us about the future fate of the biobanks we build today.

The Code of Federal Regulations of the United States of America

Nonlinear Evolution Equation presents state-of-the-art theories and results on nonlinear evolution equation, showing related mathematical methods and applications. The basic concepts and research methods of infinite dimensional dynamical systems are discussed in detail. The unique combination of mathematical rigor and physical background makes this work an essential reference for researchers and students in applied mathematics and physics.

Inventing Ethan Allen

This text is meant to be a self-contained, elementary introduction to Partial Differential Equations, assuming only advanced differential calculus and some basic LP theory. Although the basic equations treated in this book, given its scope, are linear, we have made an attempt to approach them from a nonlinear perspective. Chapter I is focused on the Cauchy-Kowaleski theorem. We discuss the notion of characteristic surfaces and use it to classify partial differential equations. The discussion grows out of equations of second order in two variables to equations of second order in N variables to p.d.e.'s of any order in N variables. In Chapters II and III we study the Laplace equation and connected elliptic theory. The existence of solutions for the Dirichlet problem is proven by the Perron method. This method clarifies the structure of the sub(super)harmonic functions and is closely related to the modern notion of viscosity solution. The elliptic theory is complemented by the Harnack and Liouville theorems, the simplest version of Schauder's estimates and basic LP -potential estimates. Then, in Chapter III, the Dirichlet and Neumann problems, as well as eigenvalue problems for the Laplacian, are cast in terms of integral equations. This requires some basic facts concerning double layer potentials and the notion of compact subsets of LP, which we present.
