Antique Hatchet Restoration. SORT OF... - Antique Hatchet Restoration. SORT OF... 14 minutes, 15 seconds - Alright, how would you call this experiment? Hatchet restoration? Makeover? Wrecking an hatchet head? Yes, I know this kind of ...

Electrolysis: water and sodium carbonate solution, parts connected to negative side and steel sacrificial anodes to positive side of a DC power supply (car battery charger). 2-3 hrs at 10amp.

Hot wire foam cutter machine and high density foam (kind used as home insulation).

Smoothing the foam with 320 sandpaper.

Gluing foam piece with hot glue.

Regular white plaster brushed on foam to help with cast quality.

Lost foam mold preparation by sifting fine sand (I'm using burned out petrobond sand but any fine and dry sand would work)

Adding sodium carbonate as degassing agent and \"/>lite salt\" (a mix of potassium chloride and sodium chloride) as flux to the molten aluminum.

Peening a 10mm round stock pin.

Polishing the handle (previously sanded to 400grit) with coarse and fine polishing pomound on two cotton wheel (only coarse polishing shown in video).

Re-grinding bevels and sharpening on 200 grit belt.

Cleaver Restoration [Black Cleaver With Ebony Handle] - Cleaver Restoration [Black Cleaver With Ebony Handle] 18 minutes - New Project, new technique! I used a new technique again in the restoration of this rusty cleaver. With iron (III) chloride and coffee ...

the coarse dirt comes off very well

Oh! A hidden hole!

I want to remove the rust with electrolysis, for this I grind off the rust, so that the current can flow better.

I want to try to do the handle differently this time, so I have to cut some off here

I remove all the pitting from the sides of the old cleaver on the belt grinder.

With the orbital sander I have sanded up to a grit of 400, with the hand I now continue up to a grit of 1000

With this tool I grind the cutting edge to exactly 30°.

I drill the holes to 8mm, and the hole for hanging I also make round again

With the chisel cut a recess in the wood where later the handle will be placed

Before I glue the handles together, I make the rough contour with the file.

With the steel wool I remove the oxide layer, so that in the next pass the iron-3-chloride can work properly.

After the first pass already a very good result...

I add some dust from the ebony wood, so the glue takes the color from the wood.

With isopropanol and a cotton swab I remove the remaining glue.

Now I sand the wooden handle of the cleaver with sandpaper.

Restoration of a 105-Year-Old Rusty Pocket Knife - Restoration of a 105-Year-Old Rusty Pocket Knife 12 minutes, 54 seconds - Very Rusty 19th Century Pocket Knife Restoration. I found this folding knife at a WW1 military camp site. The knife is very rusty.
